

New CTP Replacement Parts for Heavy Equipment

CTP RUBBER TRACKS

For Mini/Mid Excavators
& Compact Track Loaders

Special Features of the CTP Rubber Tracks

- 3 Metal Cores Wound Up: Higher durability & Better flexibility
- Smaller Contact Surface (Smaller Lug) : Better grip & traction
- Bi Directional: Tracks are Interchangeable
- Reinforced Edges Between Lugs: decreasing the chance of slicing
- Jointless: Track is much stronger than the joint type

Rubber Tracks -

CTP rubber tracks are manufactured by metal core, rubber and steel cord together; the finished product forms a continuous type structure. The construction of the rubber track incorporates 3 wound up metal cores which results in increased bend ability of the track when the crawler is in action. This results in low vibration and reduction in noise level. Reinforced edges are designed with thicker rubber added between the lugs. This reduces the incidence of slicing of the edges resulting in a longer operating cycle.

Size Classification and Part number: Width(mm) x Pitch(mm) (=Distance Between Metal Cores) x Number of Links (=Number of Metal Core)
